

Hasibur Rahman

Junior Frontend Developer | MERN Stack

+8801631384599 | hasibhsb19@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Motivated Frontend Developer with hands on experience building responsive, user friendly web applications using React, Next.js, and JavaScript. Strong focus on writing clean, maintainable code and delivering smooth user experiences. Actively seeking a Frontend Developer role to contribute to meaningful projects and grow within a collaborative team.

Technical Skills

Core Technologies : JavaScript (ES6+) • HTML5 & CSS3 (Tailwind CSS)

Frameworks & Libraries : React.js • Next.js • Node.js & Express.js

Database & Authentication : MongoDB • BetterAuth

Tools & Methodologies:

- **Version Control:** Git & GitHub
- **Deployment/Hosting:** Vercel & Netlify
- **APIs:** Restful api design
- **Testing & API:** Postman & Hoppscotch

Soft Skills

- Problem Solving
- Adaptability
- Attention to Detail
- Communication

Projects

DocAppoint — Doctor Appointment Booking System

*Next.js • Tailwind CSS • Node.js • Express
• MongoDB • BetterAuth*

Live: [DocAppointmentLive](#) | ClientSide-GitHub: [DocAppointment-Clinet](#) | ServerSide-GitHub: [DocAppointment-Server](#)

Project Overview

DocAppoint is a modern, responsive web application built with the Next.js App Router. It features a dynamic doctor catalog, a seamless appointment scheduling system via modals, and a dedicated private dashboard designed to supercharge patient doctor management workflow.

Fetures

- Users can search for doctors by name or specialty and view full profiles with availability, fees, and location.
- Users can book appointments online via a modal form no hospital visit needed just to schedule.
- Logged-in users can view, update, or cancel their bookings anytime from a personal dashboard.
-

Tiles Gallery — Premium Interior Tiles Showcase

*Next.js • Tailwind CSS • BetterAuth
• MongoDB*

Live: [Tiles-Gallery-Live](#) | ClinetSide-GitHub: [Tiles-Gallery-Client](#) | ServerSide-GitHub: [Tiles-Gallery-Server](#)

Project Overview

Tiles Gallery is a dedicated web application designed to showcase a modern curation of premium interior tiles. This platform helps users browse, search, and check out detailed tile specifications online from anywhere easily.

Fetures

- Users can browse and instantly search a curated tile collection by title without any page reload.
- Users can view detailed tile category, price, dimensions, and material in a clean two column layout.
- Users can register or log in with Google in one tap, with sessions maintained across page refreshes.
